

Sebastian Søgaard Larsen

Cand.it. Digital Design and Interactive Technologies - Interaction Design

Innovative, outgoing, responsible and solution-oriented employee. As a recent graduate, I am eager for new challenges where I can apply and grow my knowledge of IT development in practice. I am passionate about bringing digital ideas from the drawing board to implementation, where my primary competencies and experience are programming and designing digital solutions.

Skills

Frontend Webdevelopment

Mobile App Development

Digital Design

UX & UCD

Information Architecture

Project Management

Competencies

- HTML
- CSS & Sass
- Javascript
- React & React-Native
- Figma & Photoshop
- Artificial Intelligence
- Matlab
- Ethics and Technology
- Sustainable IT
- Data Management
- Data Design
- Tableau

Work Experience

Frontend Webudvikler

November 2020 – Februar 2021

DataAwareness are specialists in data and business intelligence. The company builds customized data storage and cloud solutions that help their customers organize and analyze business data. My primary task was to design and develop the company's upcoming user interface.

Student Assistent

Februar 2020 – November 2020

D.TAILS are experts in ecommerce with Shopify, and help their clients develop and maintain webshops. My responsibilities included designing and programming webshops, web analysis, UX and UCD, evaluating data structures, customer meetings, concept development, automated data scraping, and report development.

Data Technician

Februar 2019 – September 2019

Green Innovation Group helps their clients on a more sustainable path with their deep knowledge of sustainable technology and innovation. My responsibilities involved web design, report development, data collection, data analysis, evaluation of data structures, and data visualizations. The company has offices in both London and Portugal, which taught me to collaborate across different cultures and languages.

Data Collector

Juni 2017 – Januar 2019

At **Cowi**, I collected and structured data for large-scale surveys, which gave me insight into qualitative and quantitative methods in practice. During the employment, I was responsible for both independent work tasks and for other data collectors.

Education

Master's degree in Digital Design og Interactive Technologies

IT University of Copenhagen August 2019 – August 2021, 10,33

During my master's degree, I've developed everything from paper prototypes to functional applications and simple robots. These projects gave me hands-on experience with advanced design theory and the most relevant technologies on the market. In essence, this knowledge creates a bridge between users, design and engineering.

Advanced Design Processes	Design-driven Innovation	Designing Interactions
Designing Artificial Intelligence	Data Design	Management of Creative Projects
Prototyping Interactive Technologies	Experimental Design in practice	Situating Interactions
Users in Context	Cross-Disciplinary Teamwork	

(Click the course title for more information)

Bachelor's degree in Information Science & Communication

University of Copenhagen August 2015 – January 2019

Data Management	Information Systems	Digital Competence
Designing Digital Spaces	System Evaluation & Interaction Design	Informationseeking & Analysis
Bachelor Project	Study Design	Digital Culture
Communication in The Digital Age	Culture & Media	

During my bachelor's degree, I analysed the digitalization of private and public organizations. The courses introduced me to theories on information architecture, digital communication and digital cultures. The bachelor fostered my interest in the design and development of IT systems, which brought me to the IT University of Copenhagen.
